ROOF, SIDING & GUTTERS

BUILDING PERMIT

A building permit is required **before** construction begins.

CONTRACTOR LICENSING

All contractors who work in the Village must be licensed.

Roofing Requirements:

- Installation shall be in compliance with the adopted 2006 IRC codes.
- All components shall be installed in accordance with manufacturer instructions.
- Drip edge and/or gutter apron is required on roof edges.
- Flashings next to vertical surfaces shall be step-type flashings.
- Flashings next to vertical brick surfaces shall be stepped & counter-flashed.
- Ice barrier shall be required on all eaves.
- Proper fastener length required per manufacturer instructions.
- Adequate attic ventilation shall be provided.

Siding Requirements:

- Installation shall be in compliance with the adopted 2006 IRC codes.
- All components shall be installed in accordance with manufacturer instructions.
- Required flashing shall be properly installed.
- Caulking required around all windows, doors and any penetrations.

Gutters:

- All components shall be installed in accordance with manufacturer instructions.
- Gutters and downspouts shall be properly secured.
- Downspouts shall discharge a minimum of five feet (5') from the primary structure, but shall NOT discharge on any adjacent property.
